

7th

World Summit
on Pediatrics

PARIS 2023

28 September - 1 October

Hyatt Regency Paris Étoile
3 Pl. du Général Koenig, 75017 Paris, Francia

Chairpersons

Jose Manuel de la Rosa - Giuseppe Mele

Scientific Director

Marie Leiner

The effects of the pandemic in all areas of a child's life have repercussions on these dimensions.

For this reason, this year we have selected "Social pediatrics as an urgent need for the future" as the main theme.

Social Pediatrics including Child health in the context of society, environment, school, and family, incorporating physical, mental, and social health aspects as an indispensable component of childhood.

In addition, advocacy and policy as an absolute necessity among pediatricians to create change and to address the future of children as well as the impact of current social, political and financial determinants that will severely hamper their future.

We want to be a special voice that listens to the needs and solutions that students, residents, pediatricians, nurses, parents and teachers propose.

We can promote them for the benefit of children and society.

We invite you to be the voice, the ear and a hand that promotes needs and solutions for the benefit of children and their families around the world.
